

WHY WE NEED PROJECT MANAGEMENT

Project Management helps relate a project to an organization's objectives and strategy.

BRING PEOPLE TOGETHER

Project management provides ways to bring all those people together as a team to collaborate with each other to successfully complete a project.

SET PROPER EXPECTATIONS

Project management helps ensure that proper expectations are set around a project, realistic project planning is done, and proper estimates for budget, time, and resources are done.

AVOID RESOURCE WASTE

Project management frameworks or methodologies help avoid waste by appropriately using the organizational resources, whether human or non-human.

PUT RIGHT PLAN IN PLACE

Using project management techniques, you can create a schedule of the complete project, setup milestones, and establish deadlines. It helps you put the right plans in place.

INTEGRATE WITH SYSTEMS

Project management helps to manage external systems integrations across the organization to cater the value aspect of project in the business.
